Professional Experience

2 Yrs 10 Mos Experience

Software Engineer

Jun 2024 – Present

Sensation Software Solutions Pvt. Ltd. — *Mohali, Punjab*

- Engineered **TraceVenue**, a multi-tenant B2B2C venue booking platform using the **MERN stack**; implemented **Socket.IO** for real-time booking synchronization, automated proposal workflows, and **JWT-based authentication with RBAC** across customer, venue admin, and super-admin roles. Supported **100+ venue bookings** and deployed the application using **AWS EC2, Docker, and Amazon S3**.
- Developed and enhanced **Econiya** (econiya.com) using **Next.js**, building reusable frontend components and a custom **Content Management System (CMS)** to simplify website content management.
- Built and maintained production-grade web applications using **React.js, Next.js, Node.js, Express.js, and MongoDB**; developed reusable UI components and integrated RESTful APIs to support scalable application features and efficient data exchange.
- Supported application deployment and infrastructure configuration using **AWS EC2, Amazon S3, and Docker**. Collaborated with cross-functional teams to troubleshoot production issues, resolve technical challenges, and improve application reliability and performance.

Software Engineer Intern

Jan 2024 – Jun 2024

Sensation Software Solutions Pvt. Ltd. — *Mohali, Punjab*

- Developed **React components and RESTful APIs** for **TraceMenu**, a QR-based restaurant management platform, streamlining order processing and kitchen workflows. Contributed to a **30% improvement in operational efficiency** and real-time kitchen display integration deployed across **50+ restaurants**.
- Implemented **Redux-based cart management** with automatic quantity aggregation for duplicate items and persistent cart state across page refreshes, improving consistency throughout the ordering workflow.
- Leveraged **MongoDB transactions** to maintain data consistency across orders, payments, and inventory; implemented rollback handling for failed payments to protect database integrity.
- Optimized search performance using **debouncing**, reducing API calls by **60%**; implemented real-time updates using **Socket.IO**, pagination, and automated email notifications with **Nodemailer**.

Technical Skills

Languages & Frameworks: JavaScript (ES6+), TypeScript, HTML5, CSS3, React.js, Next.js, Node.js, Express.js.

Frontend Technologies: Redux Toolkit, SWR, TanStack Query, Tailwind CSS, React Bootstrap, Responsive Design.

Backend & Databases: REST APIs, JWT, Role-Based Access Control (RBAC), WebSockets, MongoDB, PostgreSQL.

Cloud & DevOps: AWS EC2, AWS S3, Docker, CI/CD, Render, Vercel.

Tools & Practices: Git, GitHub, Postman, VS Code, MongoDB Compass, API Integration, Performance Optimization.

Education

Master of Computer Applications (MCA)

Sep 2022 – Aug 2024

Panjab University, SSG Regional Centre

Bachelor of Science in Computer Science (B.Sc.)

Jul 2019 – Aug 2022

SD College, Kurukshetra University

Projects

DialysisOnGo

[Live]

Next.js, TypeScript, PostgreSQL

- Developed responsive interfaces for a **healthcare booking platform** designed to help patients arrange dialysis sessions while travelling.
- Used **TypeScript** to structure frontend code and improve type safety; integrated APIs and supported multilingual interfaces and CMS-managed content.

Sunny Homes Builders CRM

[Live]

React.js, .NET, SQL, SWR

- Developed reusable **React.js components** and responsive CRM interfaces for lead tracking, property management, and sales operations.
- Integrated backend APIs using **SWR** for data fetching and revalidation, supporting efficient data synchronization across the CRM screens.
- Implemented forms, validation, and dashboard functionality to streamline data entry, improve usability, and support day-to-day business workflows.

VitalWatch 365 (USA) [Live]

React.js, .NET, SQL, REST APIs

- Developed and maintained features for a **digital healthcare platform** focused on remote patient monitoring, personalized care plans, and virtual physical therapy.
- Integrated **REST APIs** and managed frontend application state to support health data workflows, patient progress tracking, and guided therapy sessions.
- Built reusable UI components and responsive layouts while improving data handling and user experience across healthcare workflows.

Appy Saúde (Angola) [Live]

React.js, .NET, SQL, REST APIs

- Contributed to a **healthcare discovery platform** for pharmaceutical products, supplements, wellness items, and healthcare establishments in Angola.
- Developed frontend workflows for **product browsing, category navigation, and pharmacy, clinic, and hospital discovery**.
- Integrated backend APIs and maintained reusable React components, application state, and responsive layouts to support consistent user experiences.
